Subject

1. I am unable to approve reference request at this time. I realize the vital function which a Control Clerk could perform and the asset which he would be to overall security management.

2. As you may know the Deputy Director (Plans) reduced our T/O increase proposal by eight positions. This reduction actually will leave us in excess of our ceiling authorization for Headquarters, therefore I am virtually hogtied in authorizing an additional increase at this time.

3. Your proposed Security Branch reorganization and division of responsibilities, which I have now approved, will undoubtedly highlight the need for the Control Clerk you are now requesting. I suggest you monitor this need closely and in several months we will request the DD(P) for additional personnel authorization. At that time, if you feel that the Clerk's position is as vital as it is now, I will support your request for an additional slot.
